8GB iPod Nano with Video

YOU PARTICIPATE IN ONE OF THE OFFERS

You register your details i.e (your address and name to send your free iPhone to)

Once you have registered it gives you a list of companies like "Netflix" etc (loads to choose from), you have to take out an offer to complete your registration.

Now this is the good part, if you take out a offer with "Netflix" it gives you a 14 day trial of free rental films and if you cancel just before the 14 day trial you will get free rental dvds and your credit card details will be cancelled or you can just take out the offer as long as you want, im still with Netflix its great. now your registration is done.

Now to get a free iPhone or Vizio VP42 HDTV you have to refer people to do the same but if you make a webpage or ebay page like this you will have one in no time. (remember you can only refer people if you complete your registration)

I have an iPod Nano and im working on a iPhone, not taken long since i setup a ebay page and put this ebook online, I have already one referred person within two days, great ah.

HOW TO REFER?

Once you register you get a referral webpage address i.e

<http://highrollers.v-bux.com/index.php?id=1879>

Once someone registers using your webpage address you get a referral.

Easy!

Now, methods of referral is something most of these don't cover. There are many easy ways to earn your referrals. If you have a MySpace, put it up there. Get those 2 or 3 that might be interested. Next, eBay. Resell this guide for \$0.99, free shipping. Sell hundreds. Make sure you are clear that you are selling a guide, and not the actual product. Change the referral address in this guide to your own referral link; everyone that buys it and actually tries it is one more referral you can check off. If you sell 200, and even 10 people try it, that's more than enough for most of the offers. If you still need more, for whatever reason: create a torrent for this file and upload it to different torrent sites. Thousands of people regularly download informational torrents- free of charge to them. There's even less investment than eBay- completely free. Everyone that downloads it and tries it, one more referral.

There are hundreds of torrent trackers, hundreds of auction sites. Myspace bulletins, emails, forums, even word-of-mouth.

You probably thinking why do websites/companies give free stuff away, well companies (i.e Netflix etc) pay them thousands of dollars just to advertise their company. In other words the more they give away the more profit they make!!!

Best of luck to you.
